PROFESSIONAL SUMMARY

Full-Stack Engineer with approx. 2 years of professional experience building and shipping production-grade web and mobile applications and API-driven systems. Hands-on experience across TypeScript, JavaScript, Node.js, React, React Native, Next.js, MongoDB, REST APIs, Socket.IO, and Stripe. Experienced in backend services, authentication and authorization, real-time application features, payment integrations, and production web applications. Also experienced in building AI-powered applications and full-stack products, with hands-on experience in RAG, LLM integration, semantic search, backend systems, and production web applications.

PROFESSIONAL EXPERIENCE

Thravos Inc, USA is a consumer-based fitness platform built around athletes, combining live workouts with a gamified fitness experience. The platform enables athletes to train, compete, and engage through interactive workout and session-based experiences.

Full Stack Engineer | Feb 2025 – Present

- Designed and shipped booking and scheduling APIs and client workflows supporting session management and Stripe payments across mobile and coach-facing web applications.
- Implemented authentication, authorization, and request validation across booking APIs to ensure secure and controlled access to sessions.
- Built backend and client-side capabilities for live workouts, including real-time updates and persistence of workout scores upon session completion.
- Developed and maintained three production websites using Next.js and React, integrating Decap CMS for MDX-based content and media management through a Git-based publishing workflow.
- Worked extensively across a TypeScript/Node.js stack, including REST APIs, MongoDB, Stripe, and authentication systems.
- Coordinated API contract changes across web and mobile applications to maintain consistent functionality across platforms.

Thravos — Software Engineering Intern | Aug 2024 – Jan 2025

- Owned QA workflows covering regression testing, bug reporting, feature validation, and release verification across web applications.
- Implemented backend functionality for referral leaderboard and competition systems.
- Designed the foundation of the notification system, including database schema design and API integration.
- Managed Jira documentation and sprint tracking to support structured engineering workflows.
- Collaborated with cross-functional teams on feature planning, testing, and product improvements.

Thravos — Summer Intern | Jun 2024 – Jul 2024

- Created comprehensive Postman API documentation for internal and external development teams.
- Authored user stories and feature breakdowns to support early-stage product planning.
- Performed QA testing across websites and web applications, identifying and documenting functional issues.
- Created application flow diagrams to improve alignment between engineering and product teams.
- Participated in sprint discussions, project planning, and feature scoping.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, HTML/CSS

Frontend: React, React Native, Next.js, Expo, Redux, Tailwind CSS

Backend & APIs: Node.js, REST APIs, Socket.IO, Authentication & Authorization

Databases & Payments: MongoDB, Prisma, Stripe, PostgreSQL

AI / GenAI: LangChain, Retrieval-Augmented Generation (RAG), Semantic Search, Vector Embeddings

Cloud & Tools: AWS, Git, Postman, Jira, Figma, Mixpanel, Vercel, VS Code

AI-Assisted Development: Claude Code, Cursor, Cowork

PROJECTS

SpecForge — AI Meeting Analyzer & Planner | FastAPI, Python, Ollama, Qwen3, Pydantic, React

- Built an AI meeting analysis system that converts transcripts into structured decisions, requirements, tasks, risks, and open questions.
- Used local Qwen3 inference with Ollama, Pydantic validation, and transcript traceability to make model output structured and verifiable.

PediT — Browser-Based PDF Editor | React, TypeScript, PDF.js, pdf-lib, Express, PostgreSQL

- Built a browser-based PDF editor supporting text, markups, drawings, images, and page operations with persistent editing state.
- Used PDF.js for rendering and pdf-lib for PDF generation, handling coordinate transformations, scaling, and rotated-page positioning.

SHRT — URL Shortener & Analytics | React, TypeScript, Express, Prisma, PostgreSQL, Neon

- Built and deployed a URL shortener with authenticated link management, Base62 codes, expiration, redirects, and click analytics.
- Implemented database uniqueness, redirect rate limiting, and dashboard caching to control redirect writes and reduce repeated database round trips.

EDUCATION

Amity University, Patna — B.Tech in Computer Science and Engineering | Oct 2021 – Jul 2025

Hope Hall Foundation School, New Delhi — Higher Secondary Education | Aug 2016 – Mar 2018

CERTIFICATIONS

- The AI Engineer Course 2026: Complete AI Engineer Bootcamp — 365 Careers, Udemy
- The Complete Python Developer — Andrei Neagoie, Udemy
